

## Recreation and Parks Department

Real People. Real Possibilities:

DON SCHONHARDT, MAYOR

Date: November 3, 2014

The Hilliard Recreation and Parks Department is scheduled to do path improvements concerning Municipal Park in 2015. A map is attached outlining the future trail plans. Listed below are the highlights of the pathway project:

1. Parts of the existing trails in the park will be upgraded from gravel to asphalt and widened from 8 feet to 10 feet.
2. An extension of the trail will run from the park through the Dorset Glen condominiums to Moundview Road.
3. A new asphalt path will extend north along the western entrance (East of Cosgray Road) of the park to Scioto Darby Road.
4. A new sidewalk connection will be made in the park crossing the western entrance (East of Cosgray Road) of the park to the parking lot next to the existing athletic fields.
5. The path will cross Scioto Darby Road and connect with the exiting path running parallel to the road.
6. A new concrete path connection will be added to the sidewalk on Lakeview Drive with improved landscaping.

The estimated cost of these improvements is \$642,000. To date the city has received a grant to fund this project in the amount of \$379,000. There is hope that additional grant monies will be available for this project.

Feel free to contact me with any questions you may have pertaining to this project.

Thank you
